# Supra eKEY® Basic app

The power to open the door to listings with your phone

The Supra eKEY Basic app is a convenient tool for showing agents, facilitating seamless access to properties, while empowering listing agents to efficiently monitor and track activity at client properties. It's the ideal companion for property access and powerful information.

- **Seamless access** – quickly and easily show properties using a smartphone or Apple Watch® in all properties in the region. Cellular coverage at a property is not required to open a Supra lockbox.

- **Flexible access options** – add an optional layer of security with biometrics, or optimize your efficiency with once-per-day PIN code, designed to streamline access when showing multiple properties in a day.

- **Stay informed with data at the door** – get real-time listing details and showing instructions the moment you unlock the lockbox.

- **View and manage lockboxes** – change lockbox shackle codes, track lockbox inventory, set access hours — all directly from the eKEY app.

- **Track showing notifications and feedback** – view start and end of showing times and listing feedback.

- **Agent safety alert** – send an alert message with map location to priority contacts, if enabled by organization.

- **Compatible with Android OS and Apple iOS**

Efficient access and an easy-to-use app makes managing lockboxes and showing information a breeze with eKEY Basic app.
